

# PCI-DSS

## common pitfalls

## for merchants

By Damien Fleuriot

PCI-DSS compliance  
is a **strategic change**,  
DO consult experts  
if in doubt.

**Challenge your CTO,  
your Risk Officer,  
your Compliance Officer  
and keep asking “why?”**

**...until you're satisfied.**

A subset of  
PCI-DSS requirements  
always apply to your  
company

...even if you use  
PCI-certified service  
providers !

Only use SAQ-A  
if you've outsourced  
your ENTIRE payment,  
including shopping  
website, to a certified  
third party.
